## magazine

### DESCRIPTION

Alimenti&Bevande is the monthly magazine specialized in hygiene, safety and controls of food products in the processes of production, transformation, analysis, transport, administration and sales.

It is aimed at professionals who, in the private and public sectors, guarantee the hygiene and safety of food and beverages: quality assurance and control managers, plant managers, production managers, laboratory managers, food consultants and official controllers.

The magazine hosts articles, research, interviews, presentations of products and services placed on the market and answers to readers' questions.

### READERS

Quality Assurance and Control Managers

Laboratory Managers

Plant Managers

Food Consultants

Production Managers

Official Controllers

## web

### SITE

Information site specializing in hygiene, safety and controls of food products.

It is aimed at professionals in the sector and is structured in different sections that concern: current news, in-depth articles, regulations, jurisprudence, expert answers to readers' questions, events, companies (producers of products and services for hygiene, safety and controls of food products), products and services.

## newsletter

### NEWSLETTER

Every two weeks, a newsletter is sent to subscribed readers, containing current news and reports on events, products and services on hygiene, safety and food product controls.
