magazine

DESCRIPTION

Selezione di Elettronica is the ideal means of updating on the results and experiences achieved in electronic design, on current market trends, providing information with focus and technical insights, application notes and reviews on all the latest product news released on the market.

It contains the bimonthly inserts Power Electronics aimed at those working in the power electronics sector and Embedded World, dedicated to hardware and software designers of embedded applications.

Selezione di Elettronica is a privileged observatory of the world of electronics.

READERS

- Designers, engineers and technicians working in the sectors of research & development, design or production of electronic systems and devices.
- Managers, sales and purchasing managers of companies in the electronics sector.
- Professionals involved with electronic applications in different sectors: industrial, medical, communications, instrumentation, automotive, military, avionics, distribution, subcontracting.

web

SITE

Elettronicanews.it is the professional electronics site, a daily updated service that allows the user to stay up to date with the latest market news in the electronics sector, as well as constantly providing technological, economic and current affairs insights.

Online support of the two paper electronics magazines (Selezione di Elettronica and PCB Magazine), elettronicanews.it covers all topics in the electronics world, from design to production of complex devices, from testing to distribution of electronic material. The site hosts written and audio-video contributions and reports of internal and external events to the publishing group, such as trade fairs and thematic conferences.

newsletter

NEWSLETTER

The weekly newsletter offers a selection of the last week's news related to the electronic world. It opens with one or more in-depth articles, published expressly for the newsletter and which – naturally – can be found on the homepage of the elettronicanews.it website.

editorial plan

SE Selezione di Elettronica

1 • January

Medicine, diagnostics and advanced electronics

2 • February

Embedded electronics and artificial intelligence

3 • March

Electronics in motor control
MecSpe • Bologna – Mar 4-6

4 • April

The advanced world of sensors

5 • May

Power electronics. State of the art and technological trends
Sps Ipc Drives Italia • Parma – May 26-Jun 28
